

RISHABH SHARMA

857-423-9193 | Boston, MA • sharma.rishabh@northeastern.edu • LinkedIn • Github [Portfolio](#)

EDUCATION

Northeastern University, Boston

Dec 2025

Mater of Science, Software Engineering Systems

4.0 / 4.0 GPA

Relevant coursework: Concepts of OOD, Data Science, Data Structure and Algorithm, Web Development, Cloud Development

Visvesvaraya Technological University, Bangalore

Aug 2019

Bachelor of Engineering, Information Science

Relevant coursework: Concepts of Object-Oriented Design, Data Structure, OS, Operation Research, Algorithm

TECHNICAL SKILLS

Programming: Java, Swift, Html, CSS, React.js, TypeScript, MySQL, MongoDB, PostgreSQL, MaterialUI

Framework: Spring Boot, Spring MVC, Bootstrap, Redux, OAuth 2.0, JUnit, Mockito, Kafka, Rest Webservices

Tools: Github, Git, Firebase, Firestore, CocoaPods, Figma, Postman, AWS, DigitalOcean, terraform, Packer, RDS, AWS Lambda.

PROFESSIONAL EXPERIENCE

Publicis Sapient, Bangalore, India: Software Engineer

Jun 2021 – May 2023

- Successfully implemented a microservices-based backend using Java Spring Boot, resulting in a 15% increase in system scalability and performance
- Developed responsive front-end components with React.js and Redux, improving user interface load times by 20% and enhancing overall user experience
- Implemented CI/CD pipeline using Jenkins, automating deployment processes and reducing release cycles from weeks to days
- Integrated Elasticsearch for efficient full-text search capabilities, improving search result relevance by 25% and query performance by 40%

Oracle Cerner, Bangalore, India: Software Engineer

Sep 2019 – Aug 2020

- Engineered "Sentinel" data channel security system, enhancing overall data security measures by 25%
- Leveraged Hadoop MapReduce framework to orchestrate distributed data processing across multiple nodes, achieving 40% reduction in data clustering latency
- Engineered fault-tolerant messaging channels using Apache Kafka, improving system reliability by 99.99% and reducing message loss
- Implemented load balancing algorithms, resulting in 35% increase in scalability

ACADEMIC PROJECTS

Cloud-Native User Management System

Sept 2024 – Dec 2024

- Architected and implemented comprehensive AWS infrastructure using Terraform, automating deployment of VPC, Load Balancer, Auto Scaling Groups, and RDS instances with 99.9% uptime while maintaining security compliance.
- Engineered custom AMI creation pipeline with Packer and shell scripts, reducing server provisioning time by 70% and ensuring consistent Java application deployments.
- Developed scalable REST API using Java Spring Boot for user management, implementing secure authentication with BCrypt encryption and AWS Secrets Manager integration.
- Designed zero-downtime CI/CD pipeline utilizing GitHub Actions workflows and Lambda-powered SNS notifications, reducing deployment time by 85% through automated instance refresh strategies.
- Implemented PostgreSQL database architecture with optimized schemas for user profiles and secure file handling, achieving sub-200ms response times for all CRUD operations while maintaining data integrity.

CarryMate

Nov 2024 – Dec 2024

- Led the Development of campus Delivery Platform focused to serve 5000+ Northeastern University Students, implementing a full Stack solution with React.js, Node.js, and MongoDB.
- Implemented a notification system using AWS SNS and SendGrid, achieving 97% email delivery rate for OTP verification and real-time delivery updates, while maintaining secure authentication for northeastern.edu domains with a 99% success rate.
- Engineered a responsive user interface using Material UI components and custom styling, reducing development time by 40% while ensuring consistent design patterns across 10+ unique interface screens and maintaining ADA compliance.
- Architected and deployed AWS infrastructure managing 30+ concurrent users, while establishing strategic partnerships with campus dining services for an integrated rewards program. Built a scalable backend using AWS RDS with 99.9% uptime to support future expansion to 10+ identified campus vendors, including Starbucks and Wollaston's Market, demonstrating strong system design and business development capabilities.

Student Management System

Feb 2024 – Apr 2024

- Architected and developed a scalable Student Management System backend using Java SpringBoot, handling student records and courses, and integrating with a MySQL database.
- Leveraged Elasticsearch for efficient data indexing and retrieval, boosting search performance by 30% and reducing data ingestion time by 25%.
- Implemented core student management system using Object-Oriented Design Principles and design patterns, ensuring scalability and maintainability across key functions.
- Designed Used Stream API for data Processing and incorporated threading, concurrency to refine systems robustness and scalability.
- Developed the front-end using HTML, CSS, and React, enhancing accessibility by 20%.
